

Contemporary Amperex Technology Co., Limited

Forest Resource Conservation Commitment

1. Purpose

As part of the global effort to respond to climate change, Contemporary Amperex Technology Co., Limited (hereinafter referred to as “CATL” or “We”) has fully acknowledged that nature provides us with multiple solutions to sustainable development challenges, with forest resources playing a critical role in maintaining global climate and ecological stability. Therefore, while promoting our own development, we place significant emphasis on the conservation of forest resources. As an important driving force in new energy technology innovation around the world, CATL has an unshirkable responsibility for forest resource protection.

2. Scope

This policy is a public statement of intent that applies to CATL and its subsidiaries and encourages both upstream and downstream stakeholders to cooperate in promoting commitment to forest resources conservation.

3. Commitment

CATL is committed to promoting the protection of forest resources and will give priority to the evaluation of impacts on and the protection and restoration of forest resources within its own operations. We also plan to gradually collaborate with more stakeholders on forest resources conservation. To achieve these goals, we pledge to strictly comply with the forest and land conservation laws and regulations of the countries/regions where our operations are located, and to take the protection of forest resources as a

key consideration in the process of project site selection, construction, and operation.

4. Action

We will take the following actions to promote the achievement of the goals:

4.1 Comply with relevant laws and regulations on environment, forest, and land protection in the countries (regions) where the project is located, and adopt timely and effective measures to avoid, mitigate, and restore any identified impacts.

4.2 Cooperate with professional institutions to conduct regular stability assessment on highly ecologically sensitive areas, and promptly improve and repair the negative impacts related to forest degradation.

4.3 Continuously improve our internal management, and gradually explore ways, methods, and models to carry out forest conservation actions with more stakeholders, mobilising more forces to participate in relevant actions.

4.4 Partner with non-profit organizations and other stakeholders to make donations for afforestation initiatives and to organise afforestation activities involving employees domestically and internationally, raising awareness on forest resources conservation and promoting local green development.

4.5 In the future, we will gradually incorporate forest resource protection related performance into the supplier qualification criteria, encouraging and supporting suppliers to establish an effective forest resource protection management system and formulate performance improvement plans.

5. Revision

This policy will be updated in due course or every three years. This commitment has been published on the CATL official website for all stakeholders to review.
